

<p>The outside with no shelter</p>	<p>If you are not in a sturdy building, there is no single recommended recommendation for what last resort action to take because many factors can affect your decision. Possible actions include:</p> <ul style="list-style-type: none"> <li>x Immediately get into a vehicle, buckle your seat belt and try to drive to the closest sturdy shelter. If your vehicle is hit by flying debris while you are driving, pull over and park.</li> <li>x Take cover in a stationary vehicle. Put the seat belt on and cover your head with your arms and a blanket, coat or other cushion if possible.</li> <li>x Lie in an area noticeably lower than the level of the roadway and cover your head with your arms and a blanket, coat or other cushion if possible.</li> </ul> <p>In all situations:</p> <ul style="list-style-type: none"> <li>x Do not get under an overpass or bridge. You are safer in a low, flat location.</li> <li>x Never try to outrun a tornado in urban or congested areas in a car or truck. Instead, leave the vehicle immediately for safe shelter.</li> <li>x Watch out for flying debris. Flying debris from tornadoes causes most fatalities and injuries.</li> </ul>
